

NEXT HTML5 Template - Update Log

Version 1.2 (Nov 06, 2013):

- We have optimized this template for more mobile devices including latest iOS 7 devices. This is done by additional mediaquery in CSS rules inside STYLE.CSS file. Optimized some heading text font sizes in small devices making it more better presented.

MODIFIED FILE:

[ROOT]/STYLESHEETS/STYLE.CSS

We have commented these changes inside STYLE.CSS so that users can easily find them in between the following commented lines:

```
/*newly added on v1.12 - Nov 06, 2013*/
```

.....

```
/*addon styles : end*/
```

Please note: We have some additional modifications on some minor CSS rules which can be traced by comparison with previous one.

- We have updated Bootstrap framework to v3.0.1 which is the latest available version of Bootstrap.
- A major change is done on mobile navigation, we have introduced a new module for this. Now this template features Sliding Navigation (sidebar style) similar to our new template DIGNITY. The module is fully integrated and tested. We have updated instructions inside the revised User Guide version 1.2 within the pack. FYI, existing users can switch to this new mobile navigation (v1.2) only if they prefer to update. Anyway the previous mobile navigation (v1.1) is not having any issues – it is also working properly.
- We have done some cleanup on markup side within this new updated HTML files. We have removed some extra wrapper classes such as **CLASS="CONTAINER"** etc. Existing users can compare the new files and simply adapt the changes.

Version 1.1 (Oct 06, 2013):

We have fixed an issue which may cause some laptops to display content overlapped by sidebar navigation. This fix is done by additional mediaquery in CSS rules. Also optimized font-size in the heading found on Expanding Panel when Service Blocks are clicked.

MODIFIED FILE:

[ROOT]/STYLESHEETS/STYLE.CSS

We have commented these changes inside STYLE.CSS so that users can easily find them in between the following commented lines:

```
/*newly added on v1.1 - Oct 06, 2013*/
```

.....

```
/*addon styles : end*/
```

An example is given here (Line 1523 to 1548):

```
1523  /*newly added on v1.1 - Oct 06, 2013*/
1524  #sidebar-nav, .sq-side-menu ul li, .sq-side-menu .first, .sq-side-menu .second{
1525      width: 100px;
1526  }
1527  .sq-side-menu ul li:hover .second .content, .sq-active .second .content {
1528      font-size: 18px !important;
1529  }
1530  .rb-grid li,
1531  .rb-grid li.rb-span-2,
1532  .rb-grid li.rb-span-4 {
1533      width: 48%;
1534      height: 14em;
1535      text-align: left;
1536  }
1537  .container {
1538      padding-left: 30px !important;
1539      padding-right: 30px !important;
1540  }
1541  .col-md-12, .container
1542  {
1543      width:900px;
1544  }
1545  .rb-week span {
1546      font-size:72px !important;
1547  }
1548  /*addon styles : end*/
```
