

PRESENCE - v1.1 (10 June 2014)

1. Fixed a weird bug experienced only on WebKit browsers: when lightbox view is closed, the page top portion is displayed. It was caused by a bug in Magnific Pop jQuery plugin and we have fixed it by replacing the entire lightbox module with a new lightbox plugin - Venobox. All files and code segments containing the previous lightbox has been replaced with new one. The following regions has been added / modified in each page.

```
33 <link href="stylesheets/venobox.css" rel="stylesheet" >
```

```
1259 <script src="javascripts/venobox.min.js"></script>
1260 <script src="javascripts/smooth-scroll.js"></script>
1261 <script src="javascripts/form-validation.js"></script>
1262 <script src="javascripts/classie.js"></script>
1263 <script src="javascripts/fancymenu-rollin.js"></script>
1264 <!-- Parallax Plugins Setup -->
1265 <script src="javascripts/jquery.parallax.min.js"></script>
1266 <script src="javascripts/parallax-init.js"></script>
1267 <!-- Scroll Animations Setup -->
1268 <script src="javascripts/wow.js"></script>
1269 <script src="javascripts/animations-init.js"></script>
1270 <!-- For videos in showcase slides -->
1271 <script src="javascripts/showcase-video.js"></script>
1272 <!-- Custom Scripts Setup -->
1273 <script src="javascripts/carousel-init.js" ></script>
1274 <script src="javascripts/portfolio.js"></script>
1275 <script src="javascripts/intro.js"></script>
1276 <script src="javascripts/venobox-init.js"></script>
```
