

REALM HTML5 Template - Update Log

Version 1.3:

There is no change in code. Only fixed an issue with User Guide and re-uploaded the pack. Documentation version is maintained as 1.0 for this release.

Version 1.2:

Only the PORTFOLIO section of the theme has been updated. So the PORTFOLIO section of index.html, style.css and script.js has been updated.

In index.html the PORTFOLIO section was like this

```
<article class="span12">
  <section id="options" class="clearfix">
    <ul id="filters" class="option-set clearfix" data-option-key="filter">
      <li class="inner-link"><a href="#filter" data-option-value="*" class="selected ">all</a></li>
      <li class="inner-link"><a href="#filter" data-option-value=".branding">brand</a></li>
      <li class="inner-link"><a href="#filter" data-option-value=".web">web</a></li>
      <li class="inner-link"><a href="#filter" data-option-value=".ecommerce">ecom</a></li>
      <li class="inner-link"><a href="#filter" data-option-value=".modern">modern</a></li>
      <li class="inner-link"><a href="#filter" data-option-value=".creative">creative</a></li>
      <li class="inner-link"><a href="#filter" data-option-value=".modern, .creative">modern and creative</a></li>
      <li class="inner-link"><a href="#filter" data-option-value=":not(.web)">all except web</a></li>
    </ul>
  </section> <!-- #options -->
  <div id="container" class="clearfix portfolio">

    <div>
      <div class="element web height-01 " data-symbol="Hg" data-category="web">
        <div class="element-image height-01">
          
        </div>
        <div class="element-text">
          <h2>Title</h2>
          <h3>Subtitle goes here</h3>
        </div>
        <div class="element-anchor">
          <a class="gallery-block" href="images/portfolio/full/dummy.jpg" data-gal="prettyPhoto[portfolio]">
            
          </a>
          <a href="#"></a>
        </div>
      </div>
    </div>
  </div>
</div>
```

In the updated index.html the PORTFOLIO section is like

```
<article class="span12">
  <section id="options" class="clearfix">
    <ul id="filters" class="option-set clearfix" data-option-key="filter">
      <li class="inner-link"><a href="#filter" data-option-value="*" class="selected">all</a></li>
      <li class="inner-link"><a href="#filter" data-option-value=".branding">brand</a></li>
      <li class="inner-link"><a href="#filter" data-option-value=".web">web</a></li>
      <li class="inner-link"><a href="#filter" data-option-value=".ecommerce">ecom</a></li>
      <li class="inner-link"><a href="#filter" data-option-value=".modern">modern</a></li>
      <li class="inner-link"><a href="#filter" data-option-value=".creative">creative</a></li>
      <li class="inner-link"><a href="#filter" data-option-value=".modern, .creative">modern and creative</a></li>
      <li class="inner-link"><a href="#filter" data-option-value=":not(.web)">all except web</a></li>
    </ul>
  </section> <!-- #options -->
  <div id="container" class="clearfix portfolio">

    <div>
      <div class="element web height-01 " data-symbol="Hg" data-category="web">
        <div class="element-image height-01">
          
        </div>
        <div class="portfolio-visibility">
          <div class="element-text">
            <h2>Title</h2>
            <h3>Subtitle goes here</h3>
          </div>
          <div class="element-anchor">
            <a class="gallery-block" href="images/portfolio/full/dummy.jpg" data-gal="prettyPhoto[portfolio]">
              >
                
            </a>
            <a href="#"></a>
          </div>
        </div>
      </div>
    </div>
  </div>
</div>
```

The new set of codes is highlighted. I.e., a set of codes are wrapped with a <div> element with a class="portfolio-visibility".

So every portfolio block must be wrapped with this <div> element.

Similarly in style.css the code representing the PORTFOLIO section has been changed.

From line number 295 till 511. ie., till `/* service page */`

In script.js file some new lines of codes are added for the mobile optimization of the PORTFOLIO section.

ie., previously the line of codes for the PORTFOLIO section at script.js was like this

```
//Portfolio Filter On Click
$('.inner-link').find('a').click(function(){
    $('.inner-link').find('a').removeClass('.selected');
    $(this).addClass('.selected');
});

//Lightbox for portfolio
$(".portfolio a[data-gal^='prettyPhoto']").prettyPhoto({
    theme: 'light_square',
    autoplay_slideshow: false,
    overlay_gallery: false,
    show_title: true
});
```

Now it has been replaced to

```
//Lightbox for portfolio
```

```
$(".portfolio a[data-gal^='prettyPhoto']").prettyPhoto({
```

```
        theme:'light_square',
        autoplay_slideshow: false,
        overlay_gallery: false,
        show_title: true
    });

var deviceAgent = navigator.userAgent.toLowerCase();

var isTouchDevice = Modernizr.touch ||

(deviceAgent.match(/(iphone|ipod|ipad)/) ||

deviceAgent.match(/(android)/) ||

deviceAgent.match(/(iemobile)/) ||

deviceAgent.match(/iphone/i) ||

deviceAgent.match(/ipad/i) ||

deviceAgent.match(/ipod/i) ||

deviceAgent.match(/blackberry/i) ||

deviceAgent.match(/bada/i));

if (isTouchDevice) {

    $(' .portfolio .element').click(function(){

        $(' .portfolio-visibility').css('visibility', 'hidden');

        $(' .element-image img').removeClass('element-onhover');

        $(this).find(' .element-image img').addClass('element-onhover');

        $(this).children(' .portfolio-visibility').css('visibility', 'visible');

    });

    //Portfolio Filter On Click
```

```
$('.inner-link').find('a').click(function(){  
    $('.inner-link').find('a').removeClass('selected');  
    $(this).addClass('selected');  
    $('.portfolio-visibility').css('visibility', 'hidden');  
    $('.element-image img').removeClass('element-onhover');  
});
```

```
/* $('.portfolio-visibility').css('visibility', 'visible');  
$('.element .element-image img').css('opacity','0.3');*/  
}
```

```
else {
```

```
$('.portfolio .element').mouseenter(function(){  
    $('.portfolio-visibility').css('visibility', 'hidden');  
    $('.element-image img').removeClass('element-onhover');  
    $(this).find('.element-image img').addClass('element-onhover');  
    $(this).children('.portfolio-visibility').css('visibility', 'visible');  
});
```

```
$('.portfolio .element').mouseleave(function(){  
    $('.element-image img').removeClass('element-onhover');  
    $(this).children('.portfolio-visibility').css('visibility', 'hidden');  
});
```

```
//Portfolio Filter On Click
```

```
$('.inner-link').find('a').click(function(){  
    $('.inner-link').find('a').removeClass('selected');  
    $(this).addClass('selected');  
});  
}  
});
```
